Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 20-39 are rejected under 35 USC 102(b) as being anticipated by Dedrick, patent number 5,696,965.

Dedrick teaches all the limitations of Claims 20-39. For example, Dedrick discloses an information distribution system, method, and logic supported by program code that serves as a portal for users to access information databases across a network. Content tailored to the informational needs of the user is displayed on a graphical user interface, wherein the displayed content is determined by the user profile, demographics, viewing history, and search criteria. Dedrick discloses business, academic, and personal applications used on networked computer systems, the use of local or wide area networks, hypertext mark-up language that links users to content and services, and a graphical user interface (GUI) that allows users to move between software applications. Dedrick further discloses local content, regional content, limited content for distribution to users, content in the form of advertisements, transaction logs, and monthly transaction statements for billing purposes (see at least abstract; Fig. 1 (10); Fig. 3 (14); Fig. 4 (20); col. 1, line 5 through col. 13, line 15).
